ABOUT ME

First-year BSc Computer Applications student focused on frontend development, with hands-on experienced building web projects using HTML, CSS, JavaScript. Interested in creating responsive, accessible user interfaces and improving through practical development, code reviews nd collaboration

PROJECTS

Personal Portfolio Website

Created a responsive single-page portfolio with navigation, project cards, and links to live demos and source code.

To-Do List • Quiz App • Tic-Tac-Toe

Used JavaScript logic and DOM manipulation to build interactive features, manage tasks or scores, and respond to user actions.

Calculator • Stone-Paper-Scissors

Practised event handling, conditional logic, and interface styling in browser-based mini projects.

Amazon Clone • YouTube Clone

Built interface replicas to practise page structure, CSS layouts, and organising reusable project assets.
